

Enterprise-Grade Application Security Made Simple

Key Business Benefits

Protect sensitive user data by preventing data leakage and web supply chain attacks in real-time.

Improve compliance with regulations such as PSD2, GDPR, CCPA and HIPAA, and standards like ISO 27001 and NIST.

Ensure application integrity by preventing code tampering and application abuse in your web and mobile apps.

Protect intellectual property and business logic that is vital to your competitive advantage by preventing reverse engineering attempts.

Code Integrity protects the source code of your application

Resilient JavaScript & Native Code Protection

With Jscrambler's polymorphic obfuscation, code locks and runtime protection, attackers won't be able to reverse engineer, debug or tamper with the code of your web/mobile app.

Robust Countermeasures

When someone tries to debug or tamper with your protected code, Jscrambler's integrity checks break the application or trigger custom countermeasures to stop the attack.

Webpage Integrity secures your website against malicious behavior

Stop Magecart and Web Supply Chain Attacks

Gain full client-side protection against web supply chain attacks like Magecart, with real-time detection and mitigation of compromised third-party code and web skimmers.

Full Client-Side Visibility & Control

Monitor and protect your website in real-time against code injections, banking trojans, malicious browser extensions, malvertising, DOM-tampering and data leakage attempts.
