

Jscrambler Delegated Compliance

Jscrambler offers a Delegated Compliance service designed to streamline PCI DSS v4 compliance, specifically focusing on the requirements outlined in sections 6.4.3 and 11.6.1. You will minimize the effort required from your team, allowing you to focus on core business activities while ensuring compliance with PCI DSS v4 standards.

Key Benefits

Team Time Savings

Jscrambler requires minimal input from your team, allowing them to focus on other priorities while script compliance is expertly managed.

Expert Industry Knowledge

Jscrambler brings extensive industry knowledge, guiding you and eventually managing which scripts to authorize and how to control them effectively.

Going Beyond the Requirements

Jscrambler's service goes beyond the basic requirements with our blocking capabilities and helps you successfully prevent digital skimming attacks.

What's Included

Jscrambler's compliance service is designed to ensure that script management is handled efficiently and effectively. Here's what this involves:

Integration Support

Jscrambler collaborates with your teams to integrate our solution into your existing systems.

Establishing a Baseline

Jscrambler works closely with your team to understand your specific needs and establish a baseline for script management. This initial phase involves close collaboration to identify which scripts are critical and how they should be managed.

Ongoing Management

Once the baseline is established, Jscrambler takes over the management of script authorization, with minimal ongoing input required from your team. Jscrambler provides regular updates and reports on the status and any changes.

Written Justification

Jscrambler assists in developing written justifications for the scripts that are authorized, ensuring transparency and compliance with PCI DSS v4 requirements.

Escalation of Critical Findings

Where Jscrambler detects suspicious activity, they will report this to your teams and recommend remediation actions.

Review Meetings

Jscrambler conducts bi-weekly review meetings for the initial phase, transitioning to monthly meetings as the service stabilizes.

Policies and Procedures

Jscrambler will create and maintain policies and procedures specifically for monitoring the payment page, ensuring that any changes or anomalies are detected and managed effectively.

Annual Assessment/SAQ Support

Jscrambler will support your team through the annual assessment/SAQ, ensuring that all compliance requirements are met and that your organization remains in good standing with PCI DSS v4.
